

I am proud to announce that, as of today, **Raytheon| Websense** is now **Forcepoint™**.

In May of 2015, Raytheon and Vista Equity Partners [created a ground-breaking joint venture](#) to address constantly-evolving cybersecurity challenges. This new entity was temporarily named Raytheon| Websense as we endeavored to determine a new name fitting for a company that brings a fresh new vision for the security industry.

Forcepoint unites Websense®, Raytheon Cyber Products and the recently-acquired Stonesoft next-generation firewall (NGFW) business to offer an integrated-platform approach to address the constantly evolving cybersecurity challenges and regulatory requirements facing businesses and government agencies.

Forcepoint was created to empower organizations to drive their business forward by safely embracing transformative technologies – cloud, mobility, Internet of Things (IOT), and others – through a unified, cloud-centric platform that safeguards users, networks and data while eliminating the inefficiencies involved in managing a collection of point security products.

Forcepoint empowers our joint customers to concentrate on what's most important to them by protecting users, data and networks in the cloud, on the road, and in the office. We simplify compliance, enable better decision-making and streamline security. We also increase the efficiency and effectiveness of scarce security professionals by automating routine security tasks and eliminating the complexity of managing a patchwork of point products.

The Forcepoint platform will protect against threats from insiders and outsiders, rapidly detect breaches, minimize “dwell time” – the period between compromise and remediation – and stop data theft. We believe Forcepoint is uniquely-positioned to offer a distinct advantage for your security business.

Our approach is to provide a unified cloud-centric platform to defend against attacks, detect suspicious activity sooner, and give the context needed to decide what actions to take to defeat the attack and stop data theft. Defend, detect, decide, defeat – this is our vision for Forcepoint 4D Security. Today, building a robust security platform demands deeper research and broader resources. As CEO, I want you to know that Forcepoint has the expertise, financial commitment and ongoing access to unique, defense-grade security technology necessary to deliver on this vision.

I want to stress that we are committed to the success of our partner network. Delivering this platform requires talented partners and we are honored that you have invested the resources needed to help deliver great value to our joint customers.

As part of our company debut, Forcepoint is launching three key new products, addressing insider threats, cloud-based protection of Microsoft Office 365™, and network security. Please read today's [press release](#) or visit and bookmark our new website: [www.forcepoint.com](http://www.forcepoint.com) Our [partner portal](#) is also where you will have access to sales and marketing materials to share with your customers about Forcepoint. Please add [email@forcepoint.com](mailto:email@forcepoint.com) to your safe senders list to hear more from us.

Thank you for continuing to partner with us. Our customers entrust us with their security. It's a responsibility we take seriously, and it's what drives us as a company to be forward, passionate, creative and relentless in all we do.

**John R. McCormack**  
Chief Executive Officer  
Forcepoint

**FORWARD WITHOUT FEAR**
