

# Arista Networks in the DNS Portfolio

Press release

Prague, 11. December 2024

**Arista Networks Limited and DNS a.s. have entered into a strategic distribution partnership, representing a significant step toward expanding DNS's portfolio in the field of network infrastructure and solutions.**

DNS a.s. will distribute Arista Networks' hardware and software products and services to technology partners in the Czech Republic and Slovakia. As a value-added distributor, DNS will focus on designing network technology solutions, configurations, and providing both business and technical support to meet the growing demand for Arista's high-performance network infrastructure.

Arista Networks will provide access to all its innovative products, technical training, marketing support, and partner portal access to ensure the best possible support for technology partners.

*„We are very pleased to welcome Arista Networks to our portfolio. This partnership allows us to offer our technology partners top-notch network solutions known for their performance, scalability, and reliability. Our technology partners will gain high-quality products for their customers and strong support from our expert team,”* said Stanislav Šmolík, CEO DNS a.s.

Arista Networks' products provide a competitive advantage through advanced automation, seamless integration, and the ability to manage complex networks with lower operational costs.
